ENRICHMENT PROGRAMS FOR SCHOOLS

ART MASTERS APPRECIATION & INDIVIDUALISM PROGRAM

WHAT'S IT ABOUT?

A well-rounded artist is one who is inspired & empowered to explore and express independent ideas and creation. In this program; artists are taken on a journey of present day art, and travel through history to learn from the past. Our focus is on the process, progress & confidence in creative expression, knowledge & experience. Our art program is holistic! Weekly lessons include modules - in addition to the craft making - such as What's Today About?, Storytime in Art!, Teamwork, and more. Artists work on smaller projects during the first half of each term, practicing and mastering age-appropriate skills that would ultimately contribute towards starting and completing the term's Master Project. These termly Master Projects are a culmination of skills and experiences. Upon completion of these Master Projects, little artists get to either take them home immediately or we will them for the end of year showcase or art exhibition (after which the artists may then bring their work home... forever). Our Art Learning System

* Fundamentals of Artists: Introduction to & Appreciation of Renowned & Unknown Art Masters & their creative styles,

* Introduction/Mastering - Fine/Gross Motor Skills - Exercises

* Create/Self-Expression: Projects, Stories, presentation, in a joyful/stress free environment, process & energy.
